

Total Valve Systems offers Flame Arrestor reconditioning.

Need to stay compliant?

Total Valve Systems has experienced technicians to provide shop refurbishment at all of our locations.

Total Valve System's facilities are fully equipped with all of the essentials to provide high quality and reliable repairs to your flame arrestors.

Our processes include:

- As received photos
 - Unit pre-test
 - Any parts found that require replacement are priced and communicated to you for approval prior to installation.
 - Flame bank is cleaned using our proprietary system.
 - Reassembly with all new gaskets.
 - Functional testing.
 - Painting of reconditioned product.
- Final quality control inspection and completion of the documentation package.**
