

# VALVE AUTOMATION

Total Valve Systems designs, manufactures, distributes and services complete valve automation systems for over 10 industries world-wide. We use only the best, most reliable valves and the latest actuators available through our global network of suppliers and distribution centers. This enables our expert engineers to create state-of-the-art, total valve control solutions that maximize performance and exceed customer expectations.

Delivery, installation, start-up and maintenance are handled by our skilled and certified service team who draw on over 35 years of combined experience in the field and ongoing technical training. Our customers from around the world have come to know Total Valve Systems as their trusted source for cutting-edge technology, outstanding performance, and quality solutions.
